## Pneumatic External Vibrators Series NTV

- Circular vibration
- Nominal frequency from 8,500 min<sup>-1</sup> to 15,000 min<sup>-1</sup>
- Centrifugal force from 7,630 N to 53,100 N
- Frequency infinitely variable by air pressure
- No bearings
- Easily and quickly removable
- Silenced version NTV Q

NTV 8-1

NTV 12-F

NTV 20-4 with NVH-4

NTV 30-4Q

### Compacting of concrete on tunnel moulds

### Application

The pneumatic external vibrators series NTV are especially suitable for compacting, conveying and loosening bulk material.

They are used for compacting concrete, emptying bins and as drives for vibrating crosses.

A special feature is the ruggedness against strong varying loads. There is no danger of overload.

### Design and functioning principle

The circular vibration is produced by eccentric rotating rotors. The frequency and herewith the centrifugal force are continuously adjustable by the operating pressure. A way valve is required for actuation (not included in scope of delivery).

### Permissible operating conditions

#### Drive medium:

Oiled and filtered compressed air

#### Operating pressure:

1 bar to 6 bar

#### Ambient temperature:

-10 °C to +60 °C

Units for other temperatures are available.

**NetterVibration** offers the accessories required for the mounting, installation, control and monitoring of vibrators and impactors.

### Netter provides solutions.

Consult our experienced application technicians.
